EDUCATION

McGill University, 2018-2021

Software Engineering, GPA: 3.7/4.0
Minor in Entrepreneurship

TECHNICAL SKILLS

JavaScript/TypeScript

React (JS / TS, w/ Redux)

Node.js (JS / TS)

Google Cloud Platform (Firestore,
Firebase Auth, Cloud Run, Hosting)

Python

Java

PostgreSQL (w/ Liquibase)

LANGUAGES

English (fluent)

French (native)

Spanish (beginner)

SUMMARY

I'm a software engineer with experience designing, developing, and maintaining user-focused software. Most of my experience is in full-stack web development, with personal pursuits in machine learning and natural language processing. On my own time, I love to solve rock climbing problems, build drones and travel the world.

PROFESSIONAL EXPERIENCE

WFHomie (1 year, 3 months)

Full-Stack Developer

August 2021-Present

- React Node.js TypeScript GCP PostgreSQL Liquibase Java Mixpanel
- Owned the front end of WFHomie's Analytics platform, using Airbnb's visx charting library for data visualization.
 - Full automation of class registrations on the platform, using the Google Calendar API to create and update calendar events.
 - Developed WFHomie Kudos, a Slack app installed and used by over 50 companies, and that got featured on Product Hunt's newsletters.
 - Maintained a Java (Spring) codebase and PostgreSQL database (w/ Liquibase).

Software Developer Intern

January 2021-April 2021

- React Redux Node.js JavaScript Google Cloud Platform Stripe API
- Designed, implemented, and maintained features on the WFHomie platform, often working on tight deadlines to prepare features for clients.
 - Implemented a booking system using the Stripe API
 - Designed and implemented an authentication and access control system.
 - Fully design and implemented a Slack bot that manages user interactions.

Coveo (4 months)

Software Developer Intern (Full-Stack)

May 2021-August 2021

- React TypeScript Redux Scala .NET (C#) Terraform
- Implemented a point-and-click interface that improves the user experience of a crucial part of the Coveo platform, used by end users on a regular basis.
 - Improved the performance of connectors written in C# and Go.
 - Participated in Agile ceremonies including sprint planning and retrospectives.

CGI Inc. (4 months)

Programmer Analyst Intern

May 2019-August 2019

- C# .NET PowerShell
- Developed a desktop application to automate the migration of mailboxes from on-premise Exchange servers to Office 365.
 - Wrote PowerShell scripts to automate tedious tasks executed by technicians.
